Advantages L 400 rack system

Available rack widths

390 x 390 mm
396 x 396 mm

Tilting position

The glasses and cups can be tilted using the terrace insert. This enables even better cleaning results.

Colour-coded corner profiles

Corner profiles are available in various colours to quickly match the glass and the suitable rack.

Easy rack measurement

Extra service: Rack measurement with the FRIES measuring chart

The FRIES measuring chart helps you to find the right rack type easily. Using the measuring chart, the suitable compartment division and height of the glasses can be identified easily.

Rack system L 400

"The ideal solution for cleaning, storage and transport."

The 400 x 400 mm rack system is suitable for glasses up to a height of 264 mm for undercounter machines. The rack compartment is adjusted to the glass diameter and glass height in each case. The FRIES rack system L 400 offers versatile use in cleaning, storage and transport. Optional colour-coding makes handling even easier.

Rack system L 400 ... at a glance

- » stackable
- » light-weight
- » easy checking of rack contents
- » good carrying comfort
- » less glass breakage through customisation
- » tilting of glasses as option
- » suitable for transport on Euro pallets
